Customization at its core

Clearspan Connect allows you to design a solution with our core feature packages and customize them to your exact requirements.

- **Connect Basic:** Perfect for common areas like reception, break room, warehouse where full UC features are not required

- **Connect Standard:** A complete Unified Communication solution with full telephony features, unified communications, desktop and mobile app for collaboration, chat and meetings

- **Connect Call Center:** A suite of applications to manage a call center including agent desktop clients, supervisor client, reporting and dashboard applications

- **Connect Specialty:** Packages optimized for Alarm Systems, Elevator and other high-impact applications with options for wireless backup and UPS failover

- **Connect Options:** Selection of additional applications for receptionists, call recording, texting and more

At Clearspan, custom comes standard

Clearspan Connect is tailor-made to allow the perfect UC fit for your organization, whether it's a large enterprise, educational institution, governmental department or other organization. By providing bespoke UC tools to your employees, Clearspan Connect offers unprecedented opportunities to improve your bottom line. Clearspan has been managing and deploying large-scale UC installations for over forty years.
